

protect your baby even before birth

Do you know...

that excessively polluted air inhaled by pregnant women can cause low birth weight, premature birth or heart and brain insufficiencies of the baby?

ReSpimask[®]

NANO FIBER

LIFE'S WORTH IT

- Facemasks with RESPILON[®] nanofiber membrane stop dangerous viruses, bacteria, mold, smog, pollen and dust particles
- Protecting yourself and your unborn child from pollution is vital for the healthy development of your baby's immunity
- The nanofiber membrane works on a purely mechanical basis; the mask is not impregnated with any chemicals or silver
- Hypoallergenic adhesive strip and the mask's unique shape ensure maximum adhesion while remaining perfectly air permeable
