

Protect your home from harmful particles

Did you know...

Be it at home, work or school, indoor air pollution levels are typically 2–5x higher than outdoor pollution levels and can quickly become 100x worse than outdoor air pollution.

window membrane

- Nanofiber door and window membrane – a new level of protection against smog, dust, pollen, moulds, insects and rain
- Best solution for allergic people – you can leave your windows open without letting in a single harmful particle
- RESPILON® can also shield your home from intense sunshine
- The membrane reduces the amount of dust in the interior, which means that you do not need to clean so often
- Practical packaging and service support make installation really easy
